Table information:

Units:

Number, Magnitude = Units

Footnotes:

The standard error indicates the uncertainty of the provisional migration estimate. For example, the 95 percent confidence interval is +/-1.96 standard errors.

These intervals reflect the model uncertainty, not the extent of future revisions to provisional data. Standard errors are non-additive.

Owing to rounding, individual figures may not sum to stated totals.

Visa type is available from July 2003

Symbols:

.. figure not available

C: Confidential

E: Early Estimate

P: Provisional

R: Revised

S: Suppressed

Status flags are not displayed
