Government of New Zealand

The 2016-17 Budget: Strong Economic and Fiscal Outlooks Are Credit Positive

On 26 May, the government of [New Zealand \(Aaa, stable\)](#) presented its budget for the 2016-17 fiscal year which begins on 1 July. The budget forecasts an economic outlook that is somewhat stronger compared to earlier projections. This stronger outlook translates into higher government revenues and, therefore, somewhat higher surpluses than earlier projected. While there are risks to the outlook, overall we view the upwardly revised projections as credit positive for the government.

The budget estimates a small fiscal surplus of 0.3% of GDP this fiscal year, with the surpluses rising gradually to 2.2% of GDP through 2019-20. After six years of operating deficits brought about by a mild recession followed by major earthquake costs in 2011, the budget returned to a small surplus in 2014-15.

One main factor supporting the surplus trend over the next several years is a relatively strong economic outlook. Real GDP is projected to grow by an average of 2.8% annually over the five years to June 2020, with positive impetus coming from net migration, service exports (mainly tourism), and housing construction. Net migration has been at record levels recently and the tourism industry has seen very strong arrivals. While housing construction has been concentrated in Christchurch because of the earthquake reconstruction, the housing market in Auckland is very strong and, partly because of immigration, is expected to remain so.

Beside a 10% annual increase in tobacco excise tax from January 2017, there are no significant changes in the tax policy. As a result, government revenues are projected to rise broadly in line with nominal GDP and remain at around 30% of GDP.

Expenditure control is the main factor underpinning the increase in the budget surplus as a percentage of GDP, with lower interest rates a contributing factor. In the budget, expenditures are projected to fall from close to 30% of GDP in fiscal 2015 to 28.3% at the end of the period, with a nominal growth rate of 3.3% annually over the coming four years. Revenues will increase at a higher 5.0%.

After a slight rise in 2016-17, the government's debt ratios are projected to decline. Gross debt as a percentage of GDP will fall to 27.9% by 2019-20, from 36.2% in fiscal 2017. One of the stated policy objectives of the government is for net debt to decline to "around" 20% of GDP by 2020. The budget projects that the ratio will reach 20.8% that year compared with 25.6% at the end of 2016-17. These debt trends are positive for the sovereign's credit profile.

We view the budget projections as reasonable, but with some risks. Because much of the fiscal improvement is based on solid economic growth, the main risks come from failure of the economy to record such gains. One possible cause would be less growth in or a reversal of net migration, which would result from exchange rate movements and/or the relative performance of the Australian and East Asian economies vis-à-vis New Zealand. Such a development would also affect construction, which is one of the drivers of economic growth.

A second risk would be to tourism, which could materialize if, for example, the NZ\$ strengthened, especially against the Australian dollar. We consider these risks could affect economic growth and government finance, but probably not enough to change the overall direction.

Other factors that could possibly affect growth negatively include housing prices, household debt and lower dairy prices for an extended period. The latter appears to be already occurring and is presumably built into the government's forecasts.

One further source of risk relates to possible constraints on restraining expenditure over a multi-year horizon. The rapid increase in population puts pressure on spending for social services and infrastructure. Moreover, with the government running a budget surplus and debt falling as a proportion of GDP, demands for additional spending may increase.

This document is intended to be provided only to "wholesale clients" within the meaning of section 761G of the Corporations Act 2001. By continuing to access this document from within Australia, you represent to MOODY'S that you are, or are accessing the document as a representative of, a "wholesale client" and that neither you nor the entity you represent will directly or indirectly disseminate this document or its contents to "retail clients" within the meaning of section 761G of the Corporations Act 2001. MOODY'S credit rating is an opinion as to the creditworthiness of a debt obligation of the issuer, not on the equity securities of the issuer or any form of security that is available to retail investors. It would be reckless and inappropriate for retail investors to use MOODY'S credit ratings or publications when making an investment decision. If in doubt you should contact your financial or other professional adviser.

Additional terms for Japan only: Moody's Japan K.K. ("MJJK") is a wholly-owned credit rating agency subsidiary of Moody's Group Japan G.K., which is wholly-owned by Moody's Overseas Holdings Inc., a wholly-owned subsidiary of MCO. Moody's SF Japan K.K. ("MSFJ") is a wholly-owned credit rating agency subsidiary of MJJK. MSFJ is not a Nationally Recognized Statistical Rating Organization ("NRSRO"). Therefore, credit ratings assigned by MSFJ are Non-NRSRO Credit Ratings. Non-NRSRO Credit Ratings are assigned by an entity that is not a NRSRO and, consequently, the rated obligation will not qualify for certain types of treatment under U.S. laws. MJJK and MSFJ are credit rating agencies registered with the Japan Financial Services Agency and their registration numbers are FSA Commissioner (Ratings) No. 2 and 3 respectively.

MJJK or MSFJ (as applicable) hereby disclose that most issuers of debt securities (including corporate and municipal bonds, debentures, notes and commercial paper) and preferred stock rated by MJJK or MSFJ (as applicable) have, prior to assignment of any rating, agreed to pay to MJJK or MSFJ (as applicable) for appraisal and rating services rendered by it fees ranging from JPY200,000 to approximately JPY350,000,000.

MJJK and MSFJ also maintain policies and procedures to address Japanese regulatory requirements.
